## Ranking Highlights<sup>a</sup>

|                               | National Rank  | Rank Among New England States* |
|-------------------------------|----------------|--------------------------------|
| <b>Overall</b>                | <b>6 of 51</b> | <b>5 of 6</b>                  |
| Reproductive & Women’s Health | 5              | 6                              |
| Access & Affordability        | 8              | 5                              |
| Prevention & Treatment        | 7              | 6                              |
| Avoidable Hospital Use & Cost | 40             | 5                              |
| Healthy Lives                 | 7              | 3                              |
| Income Disparity              | 8              | 3                              |
| Racial & Ethnic Health Equity | 8              | 4                              |

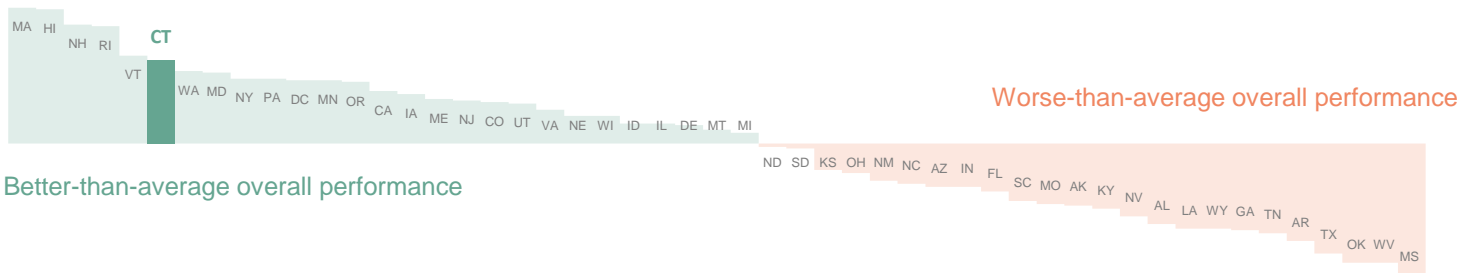

\* New England states include CT, ME, MA, NH, RI, VT

## How Health Care Performance Changed in Connecticut<sup>b</sup>

- Indicators That Improved
- Indicators That Worsened
- Indicators with Little or No Change

## How Connecticut Compares to All States

## The Best and Worst in Connecticut

### Best Performance

- Women with up-to-date breast and cervical cancer screenings
- No postpartum visit
- Children without all recommended vaccines

### Improved the Most

- Preventable hospitalizations ages 18–64
- Potentially avoidable emergency department visits age 65 and older
- Hospital 30-day mortality

### Worst Performance

- Hospital 30-day readmission rate age 65 and older
- Employer-sponsored insurance spending per enrollee
- Potentially avoidable emergency department visits age 65 and older

### Worsened the Most

- Home health patients with improved mobility
- Children who are overweight or obese
- Employer-sponsored insurance spending per enrollee

**Table 1. State Health System Performance Indicator Data by Dimension**

| Dimension and indicator  | Data year       | State rate | U.S. average | Best state rate | State rank            | Data year       | State rate | U.S. average | Change over time <sup>b</sup> |                 |  |  |  |  |
|--|-----------------|------------|--------------|-----------------|-----------------------|-----------------|------------|--------------|-------------------------------|-----------------|--|--|--|--|
| <b>Access &amp; Affordability</b>  |                 |            |              |                 | <b>2023 Scorecard</b> |                 |            |              |                               | <b>Baseline</b> |  |  |  |  |
| Adults ages 19–64 uninsured  | 2021            | 7%         | 12%          | 3%              | 10                    | 2019            | 8%         | 13%          | No Change                     |                 |  |  |  |  |
| Children ages 0–18 uninsured   | 2021            | 3%         | 5%           | 1%              | 5                     | 2019            | 4%         | 6%           | No Change                     |                 |  |  |  |  |
| Adults age 18 and older who went without care because of cost in past year                               | 2021            | 8%         | 10%          | 5%              | 13                    | 2019            | 10%        | 14%          | Improved                      |                 |  |  |  |  |
| Adults age 18 and older without a usual source of care   | 2021            | 13%        | 17%          | 9%              | 10                    | —               | —          | —            | —                             |                 |  |  |  |  |
| Individuals under age 65 with high out-of-pocket medical costs relative to their annual household income | 2020–21         | 7%         | 7%           | 5%              | 24                    | 2018–19         | 7%         | 10%          | No Change                     |                 |  |  |  |  |
| Employee total potential out-of-pocket medical costs as a share of state median income                   | 2021            | 10%        | 12%          | 7%              | 16                    | 2019            | 9%         | 12%          | No Change                     |                 |  |  |  |  |
| People with medical debt   | 2021            | 10%        | 13%          | 2%              | 18                    | —               | —          | —            | —                             |                 |  |  |  |  |
| Adults age 18 and older without a dental visit in past year  | 2020            | 27%        | 35%          | 25%             | 3                     | 2018            | 24%        | 34%          | Worsened                      |                 |  |  |  |  |
| <b>Prevention &amp; Treatment</b>  |                 |            |              |                 | <b>2023 Scorecard</b> |                 |            |              |                               | <b>Baseline</b> |  |  |  |  |
| Adults with all age- and gender-appropriate cancer screenings  | 2020            | 75%        | 69%          | 76%             | 4                     | 2018            | 75%        | 68%          | No Change                     |                 |  |  |  |  |
| Adults with age-appropriate flu and pneumonia vaccines   | 2021            | 48%        | 42%          | 54%             | 9                     | 2019            | 47%        | 41%          | No Change                     |                 |  |  |  |  |
| Adults vaccinated against COVID-19 with a booster  | 2022            | 54%        | 42%          | 63%             | 7                     | —               | —          | —            | —                             |                 |  |  |  |  |
| Diabetic adults without an annual hemoglobin A1c test  | 2021            | 10%        | 10%          | 4%              | 28                    | 2019            | 11%        | 8%           | No Change                     |                 |  |  |  |  |
| Children without all recommended vaccines  | 2021            | 16%        | 28%          | 12%             | 3                     | 2019            | 17%        | 27%          | No Change                     |                 |  |  |  |  |
| Children with a medical home   | 2020–21         | 50%        | 46%          | 55%             | 19                    | 2018–19         | 54%        | 48%          | Worsened                      |                 |  |  |  |  |
| Children without a medical and dental preventive care visit  | 2020–21         | 29%        | 38%          | 26%             | 5                     | —               | —          | —            | —                             |                 |  |  |  |  |
| Children who did not receive needed mental health care   | 2020–21         | 15%        | 20%          | 11%             | 10                    | 2018–19         | 13%        | 18%          | No Change                     |                 |  |  |  |  |
| Adults age 18 and older with any mental illness who did not receive treatment                            | 2019–20         | 56%        | 55%          | 41%             | 37                    | —               | —          | —            | —                             |                 |  |  |  |  |
| Youth ages 12–17 with a major depressive episode who did not receive mental health services              | 2019–20         | 43%        | 60%          | 33%             | 7                     | —               | —          | —            | —                             |                 |  |  |  |  |

**Table 5. Select Reproductive Care and Women’s Health Measures by Race and Ethnicity**

|  | Data year | U.S. total | AIAN people | AANHPI people | Black people | Hispanic people | White people |
|--|-----------|------------|-------------|---------------|--------------|-----------------|--------------|
| Severe maternal morbidity rate per 10,000 in-hospital deliveries         | 2020      | 88         | —           | —             | 133          | 112             | 70           |
| Infant mortality, deaths per 1,000 live births                           | 2019-20   | 5.4        | —           | 3.1           | 9.2          | 5.3             | 2.9          |
| Share of births born preterm, prior to 37 weeks of pregnancy (gestation) | 2020-21   | 10%        | —           | 8%            | 13%          | 10%             | 8%           |
| Breast and cervical cancer deaths per 100,000 female population          | 2020-21   | 22         | —           | —             | 23           | 12              | 19           |
| All-cause mortality rate per 100,000 women ages 15–44                    | 2020-21   | 124        | —           | 28            | 139          | 81              | 93           |
| Share of births not beginning prenatal care in first trimester           | 2020-21   | 22%        | 21%         | 14%           | 21%          | 21%             | 11%          |

- Notes
- (a) The 2023 Scorecard rankings generally reflect 2021 data. The 2023 Scorecard added or revised several performance measures, including the addition of 12 measures specifically related to reproductive care and women’s health and the removal of most measures around state COVID-19 response, since the June 2022 Scorecard report; rankings are not comparable between reports.
  - (b) Trend data available for 50 of 58 total Scorecard indicators. Improved/worsened denotes a change of at least one-half (0.5) standard deviation larger than the indicator’s distribution among all states over the two time points. No change denotes no change in rate or a change of less than one-half standard deviation.
  - (c) Rates are for state’s low-income population, generally those whose household income is less than 200% of the federal poverty level (FPL).
  - (d) Income disparity is the difference between the state’s low-income and higher-income (generally 400%+ FPL) populations.
  - (e) Improvement indicates that the low-income rate improved and the disparity between low- and higher-income populations narrowed; worsening indicates that the low-income rate worsened and the disparity between low- and higher-income populations widened.
  - (f) Performance data not available for all groups in every state.
  - (g) State not ranked on health system performance for white people in this report; included for comparative purposes.
- “—” means data not available.

Most data reported here can also be found in the Commonwealth Fund’s online Health System Data Center at <https://www.commonwealthfund.org/datacenter>
