How Health Care Performance Changed in Mississippi^b

- Indicators That Improved
- Indicators That Worsened
- Indicators with Little or No Change

How Mississippi Compares to All States

The Best and Worst in Mississippi

Best Performance

- Home health patients with improved mobility
- Employer-sponsored insurance spending per enrollee
- Adults with inappropriate lower back imaging

Improved the Most

- Potentially avoidable emergency department visits age 65 and older
- High out-of-pocket medical spending
- Potentially avoidable emergency department visits ages 18–64

Worst Performance

- Preterm birth rate
- Premature deaths from treatable causes
- Breast and cervical cancer deaths

Worsened the Most

- Adults with all recommended cancer screenings
- All-cause mortality rate per 100,000 women ages 15–44
- Premature deaths from preventable causes

Notes
 (a) The 2023 Scorecard rankings generally reflect 2021 data. The 2023 Scorecard added or revised several performance measures, including the addition of 12 measures specifically related to reproductive care and women’s health and the removal of most measures around state COVID-19 response, since the June 2022 Scorecard report; rankings are not comparable between reports.
 (b) Trend data available for 50 of 58 total Scorecard indicators. Improved/worsened denotes a change of at least one-half (0.5) standard deviation larger than the indicator’s distribution among all states over the two time points. No change denotes no change in rate or a change of less than one-half standard deviation.
 (c) Rates are for state’s low-income population, generally those whose household income is less than 200% of the federal poverty level (FPL).
 (d) Income disparity is the difference between the state’s low-income and higher-income (generally 400%+ FPL) populations.
 (e) Improvement indicates that the low-income rate improved and the disparity between low- and higher-income populations narrowed; worsening indicates that the low-income rate worsened and the disparity between low- and higher-income populations widened.
 (f) Performance data not available for all groups in every state.
 (g) State not ranked on health system performance for white people in this report; included for comparative purposes.
 “—” means data not available.
