How Health Care Performance Changed in Nevada^b

How Nevada Compares to All States

Better-than-average overall performance

The Best and Worst in Nevada

Best Performance

- Home health patients with a hospital admission
- Hospital 30-day readmission rate ages 18–64
- Employer-sponsored insurance spending per enrollee

Improved the Most

- Potentially avoidable emergency department visits ages 18–64
- Preventable hospitalizations ages 18–64
- Hospitals with better-than-average patient experience ratings

Worst Performance

- Children with a medical home
- Children who did not receive needed mental health care
- Children without a medical and dental preventive care visit

Worsened the Most

- Adults with inappropriate lower back imaging
- Severe maternal morbidity
- Premature deaths from preventable causes

- Notes
- (a) The 2023 Scorecard rankings generally reflect 2021 data. The 2023 Scorecard added or revised several performance measures, including the addition of 12 measures specifically related to reproductive care and women’s health and the removal of most measures around state COVID-19 response, since the June 2022 Scorecard report; rankings are not comparable between reports.
 - (b) Trend data available for 50 of 58 total Scorecard indicators. Improved/worsened denotes a change of at least one-half (0.5) standard deviation larger than the indicator’s distribution among all states over the two time points. No change denotes no change in rate or a change of less than one-half standard deviation.
 - (c) Rates are for state’s low-income population, generally those whose household income is less than 200% of the federal poverty level (FPL).
 - (d) Income disparity is the difference between the state’s low-income and higher-income (generally 400%+ FPL) populations.
 - (e) Improvement indicates that the low-income rate improved and the disparity between low- and higher-income populations narrowed; worsening indicates that the low-income rate worsened and the disparity between low- and higher-income populations widened.
 - (f) Performance data not available for all groups in every state.
 - (g) State not ranked on health system performance for white people in this report; included for comparative purposes.
- “—” means data not available.
